Gloucestershire Covid-19 stats

Total Confirmed Cases¹
- **1,382 (1 new)**

Cheltenham - **324 (1 new)**

Cotswold - **156**

Forest of Dean - **117**

Gloucester - **404**

Stroud - **199**

Tewkesbury - **182**

Deaths in NHS Trusts² -
226 (0 new)

Deaths in all settings that occurred up to 29 May but were registered up to the 6 June³ - **568**

Care home outbreaks⁴ -
80 (0 new)

Deaths in care homes⁵ -
222 (0 new)

Your questions answered

What support is available for childcare during the school summer holidays? Some children who are normally looked after grandparents during school holidays will need to find alternative arrangements if they are shielding. Will schools remain open for key workers? If not will other support be available?

The DfE have confirmed that schools will not be required to open over the summer holiday to provide child care. Some schools do operate holiday clubs as part of their usual offer and this will continue. Most other summer childcare is managed by private providers – the details of which can be found on the [glosfamilies directory](#).

It is still the Government's ambition that providers running holiday clubs and activities for children over the summer holiday will be able to open if the science allows. A number are already accepting bookings in anticipation of this. The council is undertaking a scoping exercise to understand which providers are planning to run, should this be possible. This will help to identify any potential gaps in provision and support provided accordingly.

¹ The above data reflects nationally published data [available here](#).

² This section contains information on deaths of patients who have died in hospitals in Gloucestershire and had tested positive for Covid-19 at time of death or where Covid-19 was mentioned on the death certificate. All deaths are recorded against the date of death rather than the date the deaths were announced. It is based on national NHS data [published here](#).

³ Weekly death figures provide provisional counts of the number of deaths registered in England and Wales for which data are available. From 31 March 2020 these figures also show the number of deaths involving coronavirus (Covid-19), based on any mention of Covid-19 on the death certificate. Figures by place of death may differ to previously published figures due to improvements in the way we code place of death. This figure does not include deaths of those resident outside England and Wales or those records where the place of residence is either missing or not yet fully coded. For this reason counts may differ to published figures when summed. Bank Holidays could affect the number of registrations made within those weeks.

⁴ Care homes vary in size and in the characteristics of their residents. Outbreak data is also being reported publicly here: <https://www.gov.uk/government/statistical->

[data-sets/covid-19-number-of-outbreaks-in-care-homes-management-information](#).

The figures here are slightly lower than our local figures due to a time lag. The number of cases (confirmed or suspected) has not been reported due to limitations in data accuracy which means comparison is not possible. This information is being used for operational purposes. As testing in care homes increases we will review whether adding this information will add additional strategic insight.

⁵ CQC publish figures on deaths where Covid-19 was suspected in the notification from the care home, as well as all cause mortality (since 10 April 2020). It is probable that not all deaths due to Covid-19 will be notified as such, conversely Covid-19 may be mentioned but not have been a contributory factor in a death). While CQC numbers are more comprehensive than local reporting, they are not currently reported by district council.
